Article 5

The clearance procedures and regulations of drugs that contain narcotic or psychotropic substances that are in the possession of patients visiting or leaving The Kingdom and are for personal use, or in the possession of Haj missions or official government envoys (only) coming into or leaving The Kingdom and are used by patients who are members of these missions or envoys.

1. The clearance of locally and internationally banned drugs and substances is prohibited.
2. Drugs that are stated under section (D) from the first table, or section (A) from the second table in the Anti- Narcotic and Psychotropic Regulation, and the substances that are referred to in point (fourth)* in the tables of the Anti-Narcotic and Psychotropic Regulation, the clearance of these drugs and substances is prohibited.
3. A request for clearance is submitted to the branch of the Saudi Food & Drug Authority at the port of entry the drugs are entering from (or The Saudi Food & Drug Authority main branch in case a branch is not available in the area or province).
4. Drugs that are in the possession of patients arriving into The Kingdom and are for personal use, are allowed to be cleared according to the following rules:
 - A. Submitting a detailed certified medical report from the patient's treating organization, and not older than six months from the date of issue. The report should contain the following information:
 1. Patient's information.
 2. Diagnosis.
 3. Therapeutic regiment and its duration.
 4. Recommendations.
 5. Drug's generic name, dosage form and the patient's prescribed dose.
 - B. Or submitting a patient's prescription certified by the same treating organization, and not older than six months from the date of issue. The prescription should contain the following information:
 1. Patient's diagnosis.
 2. Drug's generic name, dosage form and prescribed dose.
 3. Administration method and duration of treatment.
 4. Treating organization's stamp (or seal).
 - C. Submitting a written vow that the drug is for the patient's personal use only and solely on the patient's own responsibility.
 - D. Submitting a copy of the patient's identification.

5. Approval of clearance is granted based on the sufficient quantity of the drug that is enough to cover the patient for thirty days at the most, or the sufficient quantity to cover the patient for the duration of the patient's stay in The Kingdom, whichever quantity of the drug is less, and within the drug's expiration date. The following should be considered:
 - A. If the quantity of cleared drug is insufficient, the patient must visit a specialized medical practitioner that is licensed to practice in a medical organization, to verify the patient's need to continue on the same treatment.
 - B. If the practitioner verifies the need to continue on the same treatment, a patient file is opened at the same medical organization the practitioner is licensed to practice at, and the patient is prescribed an appropriate drug with a certified prescription from that organization. The patient can dispense the drug from a local pharmacy if it is available in the local market for the duration of treatment, and the patient can continue to visit the same treating organization to acquire the drug if the medical condition persists.
 - C. If the drug or an equivalent is not available in the local market, the patient's treating organization can provide the drug through suppliers or distributors after gaining the approval of The Saudi Food & Drug Authority.
6. If the drug is in an injectable form, approval for clearance is granted provided it is under the supervision of the local treating organization for the patient. The drug is registered on the hospital's records as to be used undergoing the regulations for this drug for this specific patient only.
7. If the cleared drug quantity exceeds the patient's need, the remaining quantity is disposed of.
8. Patients leaving The Kingdom will be treated as patients entering it according to what is stated in points 1, 2, 3 and 4 from this article, and with a quantity of drug to cover the patient for three months at the most.
9. If the drugs are not in the patient's possession and are in the possession of a relative (parent, offspring, sibling or spouse), a copy of the relative's identification is taken. If the drugs are in the possession of another person, an approval from the patient allowing that person to possess his medication must be submitted, and that person's identification copy is taken.
10. If drugs containing narcotics or psychotropic substances are in the possession of Haj missions or official government envoys (only) coming to The Kingdom, and these drugs are for the use of mission or envoy members only, the following is applied:
 - A. The mission submits a clearance request to the Saudi Food & Drug Authority's branch at the point of entry at which the drug will enter from.

- B. Submitting the name of the head of the mission and the name of the pharmacist or pharmacist technician who is accompanying the mission and who is responsible for safeguarding the narcotics and psychotropic substances, and if no pharmacist or technician is available, the name of the mission's accompanying physician will be given and held responsible for safeguarding these substances.
- C. Submitting the number of mission members.
- D. The following are submitted with the request:
1. A list of the required drugs that is approved from the appropriate government agency from the country the mission came from. The list must include the generic names of the drugs, dosage forms, strengths (or concentrations), sizes and needed quantities.
 2. A written vow that the drugs are to be used by mission members only and at their own responsibility, the drugs are not to be intended for sale or used in any other way, and the remaining quantities or what are expired, used, and drug containers are all returned with them when the mission leaves. A list containing the administered drugs and the reason for administration along with the quantities of the remaining and the expired drugs, must be submitted to the Saudi Food & Drug Authority's branch at the point of entry by the mission before leaving The Kingdom.
- E. A clinic or a physician should accompany the mission and the needed drugs should be under the supervision and responsibility of the head of the mission.
- F. The needed drugs should not contain any internationally or locally banned substances.
- G. Importing drugs containing narcotic or psychotropic substances should be done through air freight only.
11. When the request is approved, a clearance license will be issued by the Inspection and Clearance Unit Supervisor at the port of entry branch of the Saudi Food & Drug Authority.
12. The Saudi Food & Drug Authority branch available in the area or province that the port of entry at which the drugs will enter from has the right to accept, reject or amend the request with the clarification of the justifications.
13. When the mission leaves The Kingdom, a copy of the list containing the administered drug quantities, the reason for administration, remaining quantities and damaged (expired) drugs, should be presented.
