HUNGARIAN PRODUCTS AND SERVICES

Medical sector:

- single-use, sterile disposable items (e.g. hypodermic needles, infusion & transfusion devices, catheters, bags etc.)
- band-aid, gauze
- diagnostic, analytical and hospital equipment and tools (e.g. for blood-sugar and urine analysers, endoscopic equipment, portable ECG devices, incubators, blood pressure gauges, surgery tools etc.)
- specialized hospital furniture
- prostheses and prosthetic parts (e.g. joint replacements)
- testing of drugs
- fully-equipped emergency cars

Pharmaceutical products:

- a wide range of drugs and input materials used in the pharmaceutical industry
- dietary supplements (e.g. products with vitamins, micro-elements, natural extracts etc.)

Agricultural sector:

- farm machinery (no tractors but almost any kind of equipment for tillage, spraying, sowing, harvesting, processing etc.), forestry machines
- environmentally friendly (natural) solutions for enhancing the water storage capacity of the soil, thereby considerably decreasing drought risks and irrigation water usage
- micro-nutrient solutions for foliar applications

Food and drinks:

- high quality products for high-end tourism establishments (e.g. jams, tea, goose liver, mangalitzka pork products, confectionery etc.)
- mineral water, fruit juice, wine, sparkling wine, spirits
- dairy products for final consumption or for further processing (e.g. cheese, ice cream, milk powder etc.)
- meat and meat products
- pasta
- canned or preserved fruit and vegetable products, mushrooms, frozen vegetables and sweetcorn

Information and communication technology:

- management software applications for a wide range of businesses and firms
- banking applications (e.g. mobile transaction security)
- system and data security, solutions for the restoration of damaged data

Environment and water industry:

- environmental technologies, services and equipment (e.g. remediation of surface mine sites, ground water management and preservation)
- water purification technologies and equipment for safe drinking water (e.g. elimination of arsenic pollution etc.)
- wastewater treatment technologies and equipment (incl. various turnkey solutions for communal wastewater treatment even within densely populated urban locations)
- technologies and equipment for communal solid waste treatment as well as for hazardous waste treatment (e.g. environmentally friendly incineration technologies, recycling technologies, elimination of medical waste, chemicals, oil etc.)

- solar technologies

High-tech industries:

- telecommunication and automation
- aeronautic equipment, sports airplanes
- electronic equipment and parts
- automotive industry products

Defence industry products and services:

- modernization of radar systems
- elimination or deactivation of ammunition and explosives
- hand weapons (e.g. sniper and destroyer rifles)

Vehicles and parts:

- urban buses (diesel or electric), special vehicles (e.g. garbage trucks, street cleaning cars etc.)
- trailers and semi-trailers
- automatic power transmission systems for buses, trucks and other heavy vehicles

Fashion and clothing:

- designer clothes and jewellery
- special fabrics (e.g. fireproof, insulating etc.)

Furniture and equipment for the hoteling industry (e.g. pools)

As an investment target, Hungary is a good location (proven by lots of long-term investments) for the following:

- manufacturing
- IT
- shared service centres
- logistics
- research and development in high-tech industries, life sciences and biotechnology, material science
- tourism

The tax system is particularly favourable for the productive industries and for R+D+I (10% CIT rate for the first EUR 1.6 million of company tax base, 19% for the remaining profits; a wide range of direct incentives and tax breaks for investments in these fields), vocational and higher education is internationally acclaimed.
