

Supplier Information Day

Monday the 19th of October at 13.30-19.00

Metrovej 5, 2300 København S, Denmark

Invitation

Hovedstadens Letbane and Metroselskabet hereby invite potential suppliers including main contractors and sub-contractors to a Supplier Information Day on the 19th of October 13.30-19.00.

Hovedstadens Letbane and Metroselskabet are together constructing more than 50 metro and light rail stations which enable new possibilities in the capital of Copenhagen. In the pipeline, is the construction of the Light Rail on Ring 3 stretching between Lyngby and Ishøj and the Sydhavn metro branch-off to the Cityring metro which are both to be tendered in the coming year.

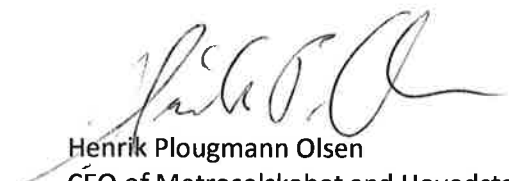

- The Light Rail on Ring 3 will include 28 stations on a 28 kilometer stretch. Frequent services at five-minute intervals on weekdays make the light rail an attractive public transport solution. The light rail is expected to carry 13-14 million passengers a year.
- The Sydhavn metro line is a branch-off from Cityringen which will consist of four underground stations at Fisketorvet, Frederiksholmsløbet, Slusen and Mozarts Plads and an elevated railway station at Ny Ellebjerg where the connection between regional and S-train lines will be possible. The new metro line is expected to carry 4-6 million passengers a year.

It is the overall ambition of Hovedstadens Letbane and Metroselskabet that the projects are tendered out in a way which is attractive to the market. Therefore, the Supplier Information Day provides the opportunity to receive information on the two respective projects and ask questions regarding these, to meet the Project Directors and project staff and to engage in informal discussions on the projects.

For binding registration, please send your contact details including name, title and company to the email address supplierinformationday@m.dk, no later than the 7th of October at 12.00.

We look forward to welcoming you to the Supplier Information Day which will take place in English.

Kind regards,

Henrik Plougmann Olsen
CEO of Metroselskabet and Hovedstadens Letbane
