Other information:	<p>About Kvuzat Yavne Food Products</p> <p>Kvuzat Yavne Food Products is a kibbutz plant established over 60 years ago in Kvuzat Yavne, the veteran and flourishing religious kibbutz located in the center of the country. Over the years, Kvuzat Yavne Food Products has become a leading Israeli producer of pickled products that excels in their taste and quality.</p> <p>Yavne's pickled products have been sold in Israel for almost a quarter of a century, but the plant itself has been in existence since it produced canned meat for the British army in 1938.</p> <p>Some of the olives are grown and processed by members of the kibbutz, in orchards surrounding Kibbutz Yavne, while the cucumbers, which are brought in from a distance, are pickled a short time after being picked. The plant annually produces thousands of tons of a wide variety of olives and pickled vegetables of excellent</p>

quality and taste. The choice of olives includes green olives such as: Manzanillo, Queen (Nouvo), Syrian, cracked, pitted and sliced, and colored olives such as: black, natural, and marinated in wine vinegar. Other vegetables include cucumbers pickled in brine or in vinegar, pickled mini-eggplants, hot peppers, red sweet peppers, tomatoes and lemons. And last but not least – olive oil.

The products are available in family or institutional size as well. The green Manzanillo and pitted Manzanillo olives, as well as the pickled cucumbers, are available in economical containers of 1.250 kg and 3 kg. Also available in 1.250 kg containers are Queen (Nouvo) olives and green spicy cracked olives.

Many of our products are also available in high quality glass jars.

During the past 15 years, there has been a dramatic increase in sales. Despite this, the Kvutzat Yavne pickling plant has maintained its position as the leading company on the market, thanks to a strategic decision made by the management – there is no compromise when it comes to quality, even at the expense of quantity. In order to maintain a high level of quality throughout, we have purchased the best automated equipment available. Some of it has undergone further development in Israel, at the initiative of Kvuzat Yavne Food Products.

In 1997, the plant was expanded and modernized. A new system for the intake of the various vegetables uses some of the most advanced technologies. The filling of the cans, the addition of spices, the pasteurization and the packaging are all done by means of modern equipment. Our automation is the most up-to-date available. Sophisticated, computer-operated video cameras film each olive from all sides, in order to classify it in terms of quality, size and further processing. The high-tech sorting is designed to replace manual sorting, and enables the plant to produce high-quality flagship products in addition to our usual line.

One secret that guarantees the quality of our products is the use of original, genuine and natural additives, rather than artificial ones. Natural concentrates, rather than chemical emulsions, are used to enhance flavor, including real cloves of garlic rather than garlic-flavored chemicals.

Kvuzat Yavne Food Products has official proof of the high quality of its products. The plant passed two official tests – with flying colors - confirming what our customers already know: When it comes to quality, our products are unbeatable. Our plant was the first in the Israeli food industry that passed the quality tests for the international quality label ISO 9002 for 2002 the first time, without having to make any improvements, as well as the GMP (good manufacturing practices) tests of the Health Ministry, which we also passed the first time.

Kvuzat Yavne's pickled products are very successful abroad as well, thanks to their high quality and high kashrut level. Most of our customers are consumers from the Jewish market the world over – the United States, England, Belgium, France, Italy, Australia and New Zealand. Kvuzat Yavne Food Products works at high standards of hygiene, which is strictly maintained, and meets the rigid

	<p>requirements of the health authorities in these countries.</p> <p>In addition to Jewish customers, Kvuzat Yavne products are also purchased by loyal customers of other religions, including members of the Palestinian and Iranian communities, who have found that our pickled products have the Middle Eastern taste they prefer.</p> <p>Kvuzat Yavne Food Products carry the excellent kosher certificate of Badatz Chatam-Sofer, Badatz Edah Charedit in Jerusalem, the Mehadrin kashrut of Rabbi Solomon and the certificate of the Union of Orthodox Congregations of North America.</p> <p>Our products can be found in most of the food stores in Israel, thanks to extensive marketing and distribution systems. We supply our products to the three large food chains in Israel by delivering to the central warehouse of each chain. Consumers on the private market are also well served. Kvuzat Yavne has close commercial ties with wholesalers all over the country, with an extensive network of agents who reach every sales point.</p> <p>Kns global opportunities ltd company is working for Yavne group as import and export in the field of food industry where we produce and sale fried onion for retail chain supermarket in cans of 190 Gram and 400 Gram and fried onion in aseptic bag of 3Kg, 10Kg, 20Kg and up to 1000Kg for the big factory of food, salad meat, soap and bakery. with hallal and as well with high kosher supervision certification.</p> <p>The onions are peeled, diced fried and packed in unique packages which preserve their freshness entirely without human intervention. The fried onion is of high quality and natural.</p> <p>Our fried onion is very unique and make the life easier to use.</p> <p>The product has a long shelf life of 24 months UN cooled and after opening - up to 7-10 days in cooling.</p> <p>As we are capable of producing up to 150-170 tons of fried onions a day, we can promise you regular delivery at a competitive price all year long, unaffected by onion's market price. and most importantly, the dicing, mess, frying, hard work and waste (over 70%) stay with us. We have the all certification of ISO 9001, ISO 22000, HACCP, BRC.</p>

Website:	www.icdeal.co.il

Year of Establishment:	-
No. of Employees:	5 -10
Activity Sector:	E-commerce
Interested in:	Import & Export Services Cooperation / Joint venture partner Representation Franchisee
Offered products/ Services/ Cooperation	Our online store is going to offer everything from gadgets and electricity devices To smart phones and clothes.
The purpose of the visit	The purpose of the visit is to meet relevant local service providers (lawyers/accountants) that can serve as account managers on how to open an e-commerce persona / company in Cyprus. At first, the business will relay on Israeli users (and later on will expand to North America online markets) ordering products at our e-commerce site via drop shipping. There are two more projects in the process that are going to effect the perspective of online shopping.
Potential Partners:	Lawyers, account manager, exporters, importers, bank representatives and Individuals that can help in the process of establishing the company.
Other information:	<p>Special online store build to change the Israeli perception of online shopping that is higher in the Israeli online sites and not as reliable in the Chinese sites. In order to have the lowest prices in the industry and to be reliable we build partnerships that insure we can offer our members the best online shopping there is.</p> <p><u>Immediate objectives of the project</u></p> <ul style="list-style-type: none"> • Our online store is ready and active but we can't yet address to the audience in Israel because in order to start working in Israel as drop shipper (explanation below) we need an off shore company that will manage our business activities. • The location that we have chosen to open our company is in Cyprus. • It's important to emphasizes that we are not going to target and sale our products inside Cyprus, we are going to target the Israeli audience by selling Chinese and American products at the best prices . <p><u>Working method</u></p> <p>The online store is going to work on drop shipping system. Drop shipping is a retail fulfillment method where a store doesn't keep the products it sells in stock. Instead, when a store sells a product, it purchases the item from a third party and has it shipped directly to the customer. As a result, the merchant never sees or handles the</p>

	<p>product.</p> <p>The biggest difference between drop shipping and the standard retail model is that the selling merchant doesn't stock or own inventory. Instead, the merchant purchases inventory as needed from a third party – usually a wholesaler or manufacturer – to fulfill orders</p> <p><u>Benefits</u></p> <p><u>Less Capital Is Required</u>– Probably the biggest advantage to dropshipping is that it's possible to launch an ecommerce store without having to invest thousands of dollars in inventory up front. Traditionally, retailers have had to tie up huge amounts of capital purchasing inventory.</p> <p>With the drop shipping model, you don't have to purchase a product unless you already made the sale and have been paid by the customer. Without major up-front inventory investments, it's possible to start a successful drop shipping business with very little money.</p>
