EU-Ukraine business cooperation opportunities

The Deep and Comprehensive Free Trade Agreement between The EU and Ukraine entered into force on 1 January 2016, as part of their broader Association Agreement (AA). The rest of the Association Agreement, containing political and cooperation provisions, has already been provisionally applied since November 2014.

Trade picture

The EU is Ukraine's largest trading partner, accounting for more than a third of its trade. It is also its main source of Foreign Direct Investment.

Main Ukraine exports to the EU: raw materials (iron, steel, mining products, agricultural products), chemical products and machinery.

Main EU exports to Ukraine: machinery and transport equipment, chemicals, and manufactured goods.

Given Ukraine's industrial potential, the DCFTA provides an opportunity to make the country more competitive and diversify its exports.

EU and Ukraine

The AA/DCFTA aims at boosting bilateral trade in goods and services between the EU and Ukraine by progressively cutting tariffs and by aligning Ukraine's rules with the EU's in selected industrial sectors and for agricultural products. In the DCFTA Ukraine has committed itself to harmonize a large number of rules, norms and standards in a number of trade-related areas with those of the EU. These areas are competition, public procurement, trade facilitation, protection of intellectual property rights and trade-related energy aspects, including on investment, transit and transport.

Since 1993 Ukraine has also benefitted from the EU's Generalized System of Preferences (GSP). In 2013, more than 70% of Ukrainian exports to the EU of machinery and mechanical appliances, plants, oils, base metals, chemicals and textiles benefitted from GSP preferential tariffs.
