Title : Portable fire extinguishers — Maintenance and recharging
Scope : This standard has been completely revised.
 By portable fire extinguisher, this standard means extinguisher approved according to EN 3. Provided that portable fire extinguishers are in working condition, they are an effective extinguishing tool. They are especially valuable in the early stages of the fire and can be used effectively by an untrained person. Portable fire extinguishers have a long service life, but it should be kept in mind that the functionality depends on the maintenance to ensure the immediate usefulness of the portable fire extinguishers. This Swedish standard specifies requirements for control and maintenance of portable fire extinguishers so that they can offer the same function as when manufactured, delivered and installed.
 This standard includes handheld extinguishers, regardless of location.

Title : Extraction method for the analysis of lactose, glucose and galactose in soft, fresh and blue cheeses
Scope : This technical specification describes the extraction procedure for analyzing the content of lactose, glucose and galactose in fresh, soft and blue cheeses. This technical specification widens the application field of UNI/TS 11687 that was restricted to hard and long ripened cheese. Similarly to UNI/TS 11687, it is applicable to cheese in which both the reduction of lactose and the further metabolization of glucose and galactose, naturally occurred during the technological process by the action of microflora. It is not applicable to dairy products in which the lactose hydrolysis has been obtained by the addition of the beta- galactosidase enzyme, and consequently contain high concentration of glucose and galactose. The method has been validated by only one laboratory.
