Scope :	The document defines guidelines to help building operators to check if insulation materials have the needed performances and to provide them with correct and clear informations on		

the use of thermal insulating materials during the management at building site and installation.

The document aims to provide building companies, designers, public administrations and all the technicians involved in the building process with the necessary indications, depending on the application, the choice and the use of thermal insulating products.

In fact, thermal insulating products play a key role in the construction of buildings with low energy consumption (for example to achieve nearly zero-energy level, in new or refurbished buildings).

The aim is that performances will be maintained at technical data sheets levels and that building operators will follow the correct safety advices.
