ΕΜΠΟΡΙΚΟ ΚΑΙ
ΒΙΟΜΗΧΑΝΙΚΟ
ΕΠΙΜΕΛΗΤΗΡΙΟ

Λευκωσία, 13 Μαρτίου 2020

ΠΡΟΣ: Όλα τα Μέλη

Κυρία/ε,

Σας επισυνάπτουμε γνωστοποιήσεις από Εθνικούς Οργανισμούς Τυποποίησης, μελών των Ευρωπαϊκών Οργανισμών Τυποποίησης CEN/CENELEC, που περιέχουν τους τίτλους προτεινόμενων εθνικών προτύπων.

Σύμφωνα με την Ευρωπαϊκή Οδηγία που αφορά την πληροφόρηση σε θέματα τεχνικών προτύπων, μπορείτε, αφού μελετήσετε τους τίτλους: α) να ζητήσετε όπως λάβετε ηλεκτρονικά ολόκληρο το κείμενο του προσχεδίου εθνικού προτύπου, εάν αυτό είναι διαθέσιμο, β) να συμμετάσχετε στις συναντήσεις της τεχνικής επιτροπής του Εθνικού Οργανισμού Τυποποίησης που ετοιμάζει το προσχέδιο προτύπου και γ) να υποβάλετε εισήγηση στον CYS, να αρχίσει τυποποιητική εργασία σε Ευρωπαϊκό επίπεδο σχετικά με το θέμα της γνωστοποίησης, εάν φυσικά πιστεύετε ότι το εν λόγω εθνικό πρότυπο θα επηρεάσει την ελεύθερη διακίνηση προϊόντων, υπηρεσιών ή την κυπριακή βιομηχανία και οικονομία.

Τυχόν σχόλια και παρατηρήσεις παρακαλώ όπως υποβάλλονται στον Κυπριακό Οργανισμό Τυποποίησης. Σε περίπτωση που δε λάβουμε καμία ανταπόκριση, ο CYS δε θα φέρει ένσταση στην προώθηση των υπό αναφορά εθνικών προτύπων.

Για περισσότερες πληροφορίες μπορείτε να επικοινωνείτε με την κα. Μαριλένα Νικολάου, Λειτουργό Διοίκησης και Διεθνών Σχέσεων του Κυπριακού Οργανισμού Τυποποίησης (CYS), τηλ: 22 411439, Φαξ. 22 411511 και στην ηλεκτρονική διεύθυνση: m.nicolaou@cys.org.cy

Με εκτίμηση,

Ανδρέας Ανδρέου,
Διευθυντής Τμήματος Βιομηχανίας,
για Γενικό Γραμματέα.

/ΜΚ.

Title : Fire fighting and rescue service vehicles - Rescue and extinguishing vehicles - Rural water tanks

Relatedness :

National : New

Subsector : B01 **Registration Date :** 2020-02-26
Organization : AFNOR
Country : France
Project ID : 00218914/0001 **Project Established**
ICS :
National Ref : PR NF S61-941
Title : Fire safety systems (FSS) - Operating repeater equipments
Relatedness :
National : New

Subsector : B01 **Registration Date :** 2020-02-26
Organization : UNI
Country : Italy
Project ID : 01607479/0001 **Project Established**
ICS : 13.220.10, 23.040.40
National Ref : UNI1607479
Title : Fixed firefighting systems — Automatic sprinkler systems — Guidance for earthquake bracing
Scope : This document specifies requirements for earthquake protection of automatic sprinkler systems in accordance with EN 12845. This document applies only to locations in earthquake zones in accordance with EN 1998-1:2004 + AC:2009, 3.2.1 and for areas subject to peak ground acceleration above 9 % of g.
 This document does not cover all legislative requirements. In certain countries specific national regulations apply and take precedence over this document. Users of this document are advised to inform themselves of the applicability or non-applicability of this document by their national responsible authorities.

** End of Subsector **

Scope : This Austrian Standard shall be applied jointly with ÖNORM B 5320 to the testing of installation of windows, French doors and external doors, including exterior mounting parts (e.g. sun and insect screens and/or ventilation appliances) in walls which are in direct contact to external climate. Furthermore, this Standard also applies to the installation of windows between rooms with and without air condition. This ÖNORM applies to new buildings, to rehabilitation of buildings as well as to exchange of windows.

Hereinafter, windows, French doors and external doors are referred to as *„windows“*. The present ÖNORM does not apply to repair and/or reconstruction of existing windows as well as to activities in the field of monument protection. Moreover, the present ÖNORM does not cover roof windows, rooflights, façades and the like.

Subsector B09: THERMAL MATTERS

Subsector : B09 **Registration Date :** 2020-02-28
Organization : EVS
Country : Estonia **Project Established**
Project ID : 00108205/0001
ICS : 27.220, 91.120.10
National Ref : prEVS 860
Title : Thermal insulation of technical equipment - Insulation of pipes, vessels and equipment - Application of thermal insulation
Scope : This standard describes insulation of pipes, tanks and equipment, if mineral wool is used as an insulation material and sheet metal for cladding. If applicable, it can be used in other cases as well.

Relatedness :

National : New

Subsector : B09 **Registration Date :** 2020-02-28
Organization : EVS
Country : Estonia **Project Established**
Project ID : 00108206/0001
ICS : 27.220, 91.120.10
National Ref : prEVS 860-1
Title : Thermal insulation of technical equipment - Part 1: Insulation of pipes, vessels and equipment - Insulating materials and elements
Scope : This standard is one part of "Thermal insulation of technical equipment" series, which is made for engineers, contractors, but also for customers. This standard describes the basic information needed for the planning and implementation of insulation.

Relatedness :

National : New

Subsector : B09 **Registration Date :** 2020-02-28
Organization : EVS
Country : Estonia **Project Established**
Project ID : 00108207/0001

Established

ICS : 27.220, 91.120.10
 National Ref : prEVS 860-6
 Title : Thermal insulation of technical equipment - Part 6: Insulation of pipes, vessels and equipment - Cold insulation
 Scope : This standard is one part of "Thermal insulation of technical equipment" series, which is made for engineers, constructors and customers. This standard presents the most essential factors to be observed in the design, application of insulation and choice of materials for cold insulations.

Relatedness :

Subsector : B99 **Registration Date :** 2020-02-24
Organization : ASI
Country : Austria
Project ID : 00027834/0001 **Project Established**
ICS : 91.010.01, 91.040.01
National Ref : ÖNORM B 1801-1
Title : Projekt and object management in construction - Part 1: Object construction
Scope : This Austrian Standard is applicable to planning and structuring of quality, costs, deadlines as well as for the classification of documentation for construction activities during the phases of conception, planning and installation. The action area quality includes quality and quantity; costs cover costs and financing; deadlines involve dates and resources. Quality, costs and deadlines are discussed in this Austrian Standard. For the planning and structuring of processing of quantity, funding and resources relevant existing standards and guidelines shall apply. The planning and structuring system in this Austrian Standard and the explained classification systems focus primarily the field of building construction. To meet specific requirements of individual construction segments (eg. traffic infrastructure) additions and adjustments of the planning system and structure systems are allowed.

Title :	Tree care — Processes and methods for tree pruning — Part 2: Requirements for providers		
Scope :	This document specifies requirements for tree pruning service providers in environments where they are managed at the individual level in order to ensure function, safety and aesthetics. This standard also describes the processes and measures for pruning and how they are performed correctly. This document is not intended to be used for the pruning of roots, shrubs, or trees managed for production purposes, for example, for orchards and nurseries. Note: Order requirements are specified in ftSS 990001-1: 2020.

Title : Aeraulic systems for air conditioning and ventilation - Part 1: Classification and requirements of systems and components
Scope : The UNI 10339 series concerns air conditioning systems for air conditioning intended to protect health and improve the comfort of people in buildings. It therefore applies to aeraulic systems installed both in residential buildings and environments and in non-residential buildings and environments; the standard does not consider industrial buildings and environments in which air conditioning has process purposes.

Part 1 of UNI 10339 indicates and defines:

- 1) purposes pursued and functions performed;
- 2) types and classification;
- 3) adoption and characteristics (of components, plant parts and plant systems) required for the purposes of air quality and indoor environment;
- 4) adoption and characteristics (of components, plant parts and plant systems) required for energy efficiency purposes.

Title : Co-combustion, incineration and co-incineration plants - Determination of the renewable energy fraction produced by plant with 14C method at the chimney
Scope : This technical specification provides the criteria and requirements for the calculation of the renewable energy fraction produced by co-combustion, incineration and co-incineration plant with 14C method at the chimney. It is applicable to the evaluation of renewable energy fraction produced by gasification and pyrolysis plant; it is also applicable to the evaluation of CO2 emissions for the "emission trading".

Title : Volume tables of round timber without bark according to the mean diameter measured in bar. Amendment 4

Scope : This amendment of national standard will contain new tables of number values for determination of original volumes solely of ash round timber, because the current standard specifies the volume determination of the ash round timber by tables for oak tree. The revision will maintain the existing procedure on the mathematical calculation of volumes. A double bark diameter will be subtracted from the mean diameter of ash round timber measured in bark. The bark diameter will be derived from the empirical material gathered for the purpose of developing of ash volume tables in former Czechoslovakia in 1980 to 1984.

Title : Building acoustics - Acoustic classification of building units - Evaluation procedure and in situ verification
Scope : The UNI 11367 standard defines, with reference to some acoustic performance requirements of buildings, the criteria for their measurement and evaluation. On this basis, the standard also establishes an acoustic classification method (with reference to each of the requirements), for the entire property unit (except for certain types). This method allows, when possible, also a synthetic evaluation (with a single descriptor index) of the set of requirements per property unit.

Title : Acoustics - Test method for measuring vibrations transmitted from the seat to the earth-moving machinery operator - Excavator, loader, backhoe loader, dumper

Scope : European Directive 2006/42 / EC concerning construction principles of machines and their safety requirements requires manufacturers to declare the vibration emission value of their products.
European Standard UNI EN 1032 - Examination of mobile machines for the purpose of determining the values of vibratory emission - indicates general criteria but does not establish specific test procedures; the consequence is that each manufacturer performs the measurements using different test methods and different format for presentation results, making it difficult to compare the emissions of machinery produced by different manufacturers.
Furthermore, since the current legislation on occupational safety (Legislative Decree 81/2008) allows to carry out the assessment of occupational risk from vibrations using the data provided by the manufacturer, the end user may be induced to underestimate or overestimate the risk as he cannot know if and how much the test conditions followed by the manufacturer reflect the real use of the machine.
The proposed standard provides for defining the test paths, the methods for carrying out the tests and the format for presenting the results.

Title : Distribution cables with extruded insulation, of rated voltage from 3.6 / 6 (7.2) kV up to 20.8 / 36 (42) kV inclusive. Single core and single core with XLPE insulation assembled cables. Cables with aluminium tape screen and polyolefin compound cover (types 10E-6, 10E-7, 10E-8 and 10E-9)
Scope : This standard specifies the construction, dimensions and test requirements of power cables with XLPE insulation for rated voltages (U) from 10kV up to 30kV for fixed installations. The types for cable covered by this standard are:

Type 10E-6: Cable with polyolefin compound sheath, without properties in case of fire.

Type 10E-7: Cable with polyolefin compound sheath, low content halogen and special properties against fire reaction. Minimum class of fire reaction Eca.

Type 10E-8: Cable with polyolefin compound sheath, low content halogen and special properties against fire reaction. Minimum class of fire reaction Cca-s1b,d2,a1.

Type 10E-9: Bundle assembled type 10E-7 cables, with steel messenger core for overhead distribution and service.

The performance definition regarding the reaction to fire of the cables subject to this standard has been made in accordance with Delegated Regulation (EU) 2016/364 of the Commission, on July 1st, 2015, regarding the classification of fire reaction properties of construction products in accordance with Regulation (EU) No 305/2011 of the European Parliament and of the Council.

Subsector W11: ELECTRICAL ACCESSORIES

Subsector :	W11	Registration Date :	2020-02-14
Organization :	DIN		
Country :	Germany		
Project ID :	02228753/0001	Project Established	
ICS :	29.120.50		
National Ref :	DIN VDE 0664-400		
Title :	Residual current operated circuit-breakers type B without integral overcurrent protection to operate at residual alternating and residual direct currents for advanced preventative protection against fire - Part 400: RCCB Type B+		
Relatedness :			
National :	New

Subsector W27: ELECTRICAL INSTALLATIONS IN BUILDINGS

Subsector : W27 Registration Date : 2020-02-28
 Organization : BSI
 Country : United Kingdom
 Project ID : 02000293/0001 Project Established

ICS :
 National Ref : BS 7657
 Title : Specification for cut out assemblies up to 100 A rating, for power supply to buildings

Relatedness :

National : New
