Title : Material for the stabilization of road sub-bases - Composition, specifications and conformity criteria
Scope : This standard applies to industrially manufactured materials used for the construction of the upper and lower layers of the bases of roads and for the stabilisation and reinforcement of soil. The use of such stabilising materials is based on the many years of experience gained in using them, guided by the natural conditions that prevail in Estonia, the local materials used and the structural design solutions developed for roads, ensuring at the same time an economically expedient approach. The manufacturing of these materials enables the by-products of the local oil shale and cement industries to be reused in future, guaranteeing therein their suitability for the given end use as part of a stabilising binder. The standard classifies materials on the basis of their two-, seven- and 28-day compressive strength and specifies their mechanical, physical and chemical properties. It also establishes requirements for manufacturing, marking, delivery and conformity assessment. The scope of the standard does not extend to products that result from the mixing together of ingredients on a building site.

Title : Adoption and effective implementation of the Health and Safety Organization and Management Models (MOG-SSL) - Part 1: Methods of asseveration by Joint Bodies in the Tertiary sector: trade, distribution, services, tourism and public exercises
Scope : Legislative Decree 81/2008 and subsequent amendments provides for the certification of the adoption and effective implementation of the organization and management models for health and safety at work, pursuant to art. 30 of the same legislative decree, and having the aim of preventing the offenses referred to in art. 25 septies of Legislative Decree 231/01 and subsequent amendments

This faculty is delegated to the Joint Bodies (O.P.) as defined by art. 2 lett. ee) of Legislative Decree 81/2008 and as amended.

However, the law does not disclose any type of method or requirement for the implementation of the sworn activity, except for that, provided for in paragraph 3 ter of art. 51 of Decree 81, according to which "for the purposes referred to in paragraph 3-bis, joint bodies set up specific joint commissions, technically competent".

The UNI / TR 11709: 2018 technical report provides the operational guidelines valid for all work sectors, useful for the release of the MOG certification of workplace health and safety adopted and effectively implemented. The Technical Report also provides the valid text for the development of technical standards that deal with the methods of asseveration by the POs. of specific sectors.

A technical standard is therefore useful and necessary in the Tertiary sector - trade, distribution, services, tourism and public businesses - which can provide methods and tools for carrying out the MOG verification activities of companies for the purpose of issuing certification certificates on the effective implementation of the MOGs themselves by the Joint Bodies.
