

Λευκωσία, 11 Νοεμβρίου 2020

**ΠΡΟΣ: Όλα τα Μέλη**

Κυρία/ε,

Σας επισυνάπτουμε γνωστοποιήσεις από Εθνικούς Οργανισμούς Τυποποίησης, μελών των Ευρωπαϊκών Οργανισμών Τυποποίησης CEN/CENELEC, που περιέχουν τους τίτλους προτεινόμενων εθνικών προτύπων.

Σύμφωνα με την Ευρωπαϊκή Οδηγία που αφορά την πληροφόρηση σε θέματα τεχνικών προτύπων, μπορείτε, αφού μελετήσετε τους τίτλους: α) να ζητήσετε όπως λάβετε ηλεκτρονικά ολόκληρο το κείμενο του προσχεδίου εθνικού προτύπου, εάν αυτό είναι διαθέσιμο, β) να συμμετάσχετε στις συναντήσεις της τεχνικής επιτροπής του Εθνικού Οργανισμού Τυποποίησης που ετοιμάζει το προσχέδιο προτύπου και γ) να υποβάλετε εισήγηση στον CYS, να αρχίσει τυποποιητική εργασία σε Ευρωπαϊκό επίπεδο σχετικά με το θέμα της γνωστοποίησης, εάν φυσικά πιστεύετε ότι το εν λόγω εθνικό πρότυπο θα επηρεάσει την ελεύθερη διακίνηση προϊόντων, υπηρεσιών ή την κυπριακή βιομηχανία και οικονομία.

Τυχόν σχόλια και παρατηρήσεις παρακαλώ όπως υποβάλλονται στον Κυπριακό Οργανισμό Τυποποίησης. Σε περίπτωση που δε λάβουμε καμία ανταπόκριση, ο CYS δε θα φέρει ένσταση στην προώθηση των υπό αναφορά εθνικών προτύπων.

Για περισσότερες πληροφορίες μπορείτε να επικοινωνείτε με την κα. Μαριλένα Νικολάου, Λειτουργό Διοίκησης και Διεθνών Σχέσεων του Κυπριακού Οργανισμού Τυποποίησης (CYS), τηλ: 22 411439, Φαξ, 22 411511 και στην ηλεκτρονική διεύθυνση: [m.nicolaou@cys.org.cy](mailto:m.nicolaou@cys.org.cy)

Με εκτίμηση,

Ανδρέας Ανδρέου,  
Διευθυντής Τμήματος Βιομηχανίας,  
για Γενικό Γραμματέα.

/ΜΚ.

enquiry

ICS :  
 National Ref : PNE 83704  
 Title : Concrete. Repair materials. Method of Repair Indexes (RIM) for the selection of the optimal repair technique and its follow-up after repair.  
 Scope : he Repair Index Method: RIM is a multi-criteria selection-based method for choosing a repair technique from among several possible ones in which selection is optimized by defining requirements and assigning "weights" between 1 and 4 that apply to each requirement. It can be applied to structures that need to be repaired as a preliminary step to select the optimal type of repair or for the follow up/maintenance of structures once repaired.

 Organization : UNE  
 Country : Spain Latest Date for Comments : 2020-11-18

---

Project ID : P0053969/0001 Draft for public enquiry

ICS :

National Ref : PNE 23767

Title : Fire resistance tests of service installations. Vertical ducts for smoke extraction from a single compartment.

Scope : This national procedure specifies a test method for the determination of the fire resistance of smoke extraction ducts used only in single-compartment applications. In these applications, the smoke extraction system is intended to be operated until it is reached by the flames (normally at 600 °C).

This test method is only suitable for ducts constructed of non-combustible materials (Euroclasses A1 and A2-s1, d0).

EN 1366-9 covers only horizontal smoke extraction ducts intended for single-compartment applications. This standard has been developed because of the need to establish a test method to determine the behaviour of vertical sections of smoke extraction ducts used in single-compartment applications in the fire phase prior to the development of the flame.

Likewise, this standard establishes a direct application field of results adapted to the ducts subject to it, based on the one allowed by the test standards for smoke control ducts (single and multi-sector) and ventilation ducts.

<b>ICS :</b>	21.260		
<b>National Ref :</b>	ÖNORM Z 1263		
<b>Title :</b>	Filtering coolant emulsion mist-separators - Requirements and classification		
<b>Scope :</b>	This ÖNORM contains requirements for planar or pleated filter media of separators for cooling lubricant emulsion mists. It describes the test method, test bench, generation of the test aerosol and the methodology for measuring the filtration performance. These filter cartridges are classified according to their filtration performance. This ÖNORM applies to filter inserts that are tested at a flow rate specified by the manufacturer. This Standard is only applicable to water-miscible cooling lubricants (emulsions or solutions). This Standard excludes the applicability to non-water-miscible cooling lubricants (cutting oils or bore oils) or to water-miscible cooling lubricants of concentrate over 15 vol % because of possible fire and explosion hazard. Therefore, this ÖNORM is not applicable for cutting oils or drilling oils		

---

(non-water-miscible cooling lubricants with 100% of the volume of oil). The results of the measurement of the separation efficiency according to this ÖNORM cannot be used as a statement for the performance in later operation, since  $\zeta$  for example  $\zeta$  different raw gas conditions may exist in practice. In order to obtain results for comparison and classification purposes, the filter inserts are tested with an aerosol dispersed in air. Coolant mist separators using these filter cartridges, which are equipped with blowers, are not covered by this ÖNORM. Electrostatic precipitators, mass separators, wet-scrubbers and adsorption filters (such as activated carbon filters) are also outside the scope of this ÖNORM.

## Subsector N09: PLASTICS

Subsector :	N09	Registration Date :	2020-10-29
Organization :	UNI		
Country :	Italy		
Project ID :	01608627/0001	Project	Established
ICS :	13.030.50, 83.080.01		
National Ref :	UNI1608627		
Title :	Plastic raw-secondary materials - Part 10: Polystyrene from industrial residues and/or from pre and/or post-consumer materials, to be used for general purposes - Requirements and test methods		
Scope :	This standard applies to raw-secondary materials as defined in UNI 10667-1, obtained from the recycling of industrial residues and / or materials from pre and / or post-consumer styrene-based plastics, defines the requirements and test methods of mixtures of "crystal" homopolymer polystyrene (R PS), shock-resistant polystyrene mixtures (R PS-HI) and homopolymer and shock-resistant polystyrene mixtures (R PS-MIX), intended for different uses, to be used alone or mixed with others materials.		
<b>Relatedness :</b>			
National :	REV/AMD UNI 10667-10:2011		

Subsector :	N09	Registration Date :	2020-10-29
Organization :	UNI

National Ref :	UNI1608628		
Title :	Plastic raw-secondary materials - Part 12: Expanded polystyrene from industrial residues		

and/or pre and/or post-consumer materials, to be used for general purpose - Requirements and test methods

**Scope :** This standard applies to raw-secondary materials as defined in UNI 10667-1, obtained from the recycling of industrial residues and / or materials from pre and / or post-consumption of expanded polystyrene-based plastics, defines the requirements and methods of test of the expanded polystyrene based mixtures called R PS-E C; R PS-E B, R PS-E M; R PS-E T, R PS-E G, R PS-E D, intended for different uses, to be used alone or mixed with other materials.

**Relatedness :**

National : REV/AMD UNI 10667-12:2006

**Subsector :** N09 **Registration Date :** 2020-10-29

**Organization :** UNI

**Country :** Italy

**Project ID :** 01608629/0001 **Project Established**

**ICS :** 13.030.50, 83.080.01

**National Ref :** UNI1608629

**Title :** Plastic raw-secondary materials - Part 15: Polyethylene terephthalate from post-consumer, industrial scraps and residues from mechanical recycling to be used for chemical recycling and depolymerisation - Requirements and test methods.

**Scope :** This standard applies to raw-secondary materials as defined in UNI 10667-1, obtained from the recycling of plastic materials from industrial residues and / or post-consumer materials. This standard defines the characteristics of recycled polyethylene terephthalate (R-PET) coming from:  
post-consumer products and semi-finished products, industrial waste and scraps, residues from mechanical recycling plants, to be used for chemical recycling by depolymerization.

**Relatedness :**

National : REV/AMD UNI 10667-15:2008

**Subsector :** N09 **Registration Date :** 2020-10-29

**National Ref :** UNI1608630

**Title :** Plastic raw-secondary materials - Part 17: Blends of heterogeneous plastics from industrial residue and/or from post-consumer materials, to be used in metallurgical and steel processes - Requirements and test methods.

**Scope :** This standard applies to raw-secondary materials as defined in UNI 10667-1, obtained from the recycling of plastic materials from industrial residues and / or post-consumer materials. The standard defines the requirements and test methods for heterogeneous mixtures to be used alone or mixed with other materials in metallurgical and iron and steel processes, for one or more of the following functions:  
a) as a reducing and / or foaming agent;  
b) as a protective agent of the elements to be preserved during the melting process;  
c) as a vector of reactants in redox reactions;  
d) for the production of mixtures typically used for the contribution of carbon and hydrogen to the process (e.g. coke)

**Title :** Digital Enabling Technologies. Decentralised Identity Management Model based on Blockchain and other Distributed Ledgers Technologies. Part 1: Reference Framework  
**Scope :** This standard defines a framework for decentralised identity management aimed to individuals and legal entities, which includes the description of a life cycle approach and the relationship of the main players participating in it, as well as the interrelationships between them.

This standard meets at least the following criteria:

- it is technologically neutral;
  - it is compatible with other relevant international standards on digital identity (see 2. References);
  - the application of this standard allows compliance with current privacy and personal data protection regulation;
-

- it is compatible with any other applicable regulatory provision;
- it is aligned with the relevant provisions of Commission Implementing Regulation (EU) 2015/1502 of 8 September 2015 on setting out minimum technical specifications and procedures for assurance levels for electronic identification means pursuant to Article 8(3) of Regulation (EU) No 910/2014 of the European Parliament and of the Council on electronic identification and trust services for electronic transactions in the internal market (Text with EEA relevance), and the Spanish National Security Scheme;
- it enables the deployment of practical, usable, flexible and cost-efficient decentralised identity management systems;
- it takes into account the specific needs of small and medium-sized enterprises (SMEs); and,
- it is suitable for use in business-to-business relationships with individuals.

**Title :** Digital Enabling Technologies. Decentralised Identity Management Model based on Blockchain and other Distributed Ledgers Technologies. Part 1: Reference Framework

**Scope :** This standard defines a framework for decentralised identity management aimed to individuals and legal entities, which includes the description of a life cycle approach and the relationship of the main players participating in it, as well as the interrelationships between them.

This standard meets at least the following criteria:

- it is technologically neutral;
- it is compatible with other relevant international standards on digital identity (see 2. References);
- the application of this standard allows compliance with current privacy and personal data protection regulation;
- it is compatible with any other applicable regulatory provision;
- it is aligned with the relevant provisions of Commission Implementing Regulation (EU) 2015/1502 of 8 September 2015 on setting out minimum technical specifications and procedures for assurance levels for electronic identification means pursuant to Article 8(3) of Regulation (EU) No 910/2014 of the European Parliament and of the Council on electronic identification and trust services for electronic transactions in the internal market (Text with EEA relevance), and the Spanish National Security Scheme;
- it enables the deployment of practical, usable, flexible and cost-efficient decentralised identity management systems;
- it takes into account the specific needs of small and medium-sized enterprises (SMEs); and,
- it is suitable for use in business-to-business relationships with individuals.
