

New Scholarship Opportunities by KIOS for the MSc program in Intelligent Critical Infrastructure Systems

The KIOS Research and Innovation Center of Excellence (KIOS CoE) announces 5 Master-level Scholarships for the MSc program in Intelligent Critical Infrastructure Systems. The program is offered by the Department of Electrical and Computer Engineering at the University of Cyprus in collaboration with KIOS CoE and Imperial College London, UK.

Scholarships will be awarded based on merit and can cover up to 100% of the tuition fees. In addition, there is the option for successful scholarship applicants to receive a monthly salary for part-time employment at KIOS CoE, the largest research center at the University of Cyprus.

Interested candidates can apply under any of the following two scholarship schemes:

Tuition Scholarship: Includes 50% - 100% of the University tuition fees, depending on applicant qualifications.

Tuition & Employment Scholarship: On top of the tuition scholarship, it includes a gross monthly salary for employment at KIOS CoE in the range of €750 – €1100, depending on monthly working hours.

The applications should be submitted as soon as possible, but not later than **Friday, 11 June 2021 at 5 pm**. For more information visit the link: <https://bit.ly/3eLGkNQ>

The innovative MSc Program in Intelligent Critical Infrastructure Systems is offered for the third consecutive year. The Program's objective is to teach highly innovative intelligent system methods and tools from emerging Information and Communication Technologies (ICT). The main purpose is to tackle challenging problems in modern Cyber-Physical Systems, with emphasis on monitoring, control, management and security in critical infrastructure systems. These systems include electric power and energy systems, water distribution networks, telecommunication networks, transportation systems, and emergency response systems.

The program's curriculum offers a unique opportunity for professionals working in critical infrastructure systems to further specialize and formalize their education with the newest ICT approaches relevant to modern infrastructures. Moreover, it provides an excellent option for students with a Bachelor's degree in engineering or natural and applied sciences who want to pursue a professional career in critical infrastructure systems or an advanced research career by progressing with a PhD degree in the field.

The duration of the program is 3 semesters (1.5 years) and is available to study part-time (6 semesters / 3 years). Courses are delivered by academics from University of Cyprus and Imperial College London and the language of instruction is English.

For more information about the MSc program please visit the program's website at www.msccis.ucy.ac.cy or contact us directly at +357 22893460 / msccis@ucy.ac.cy.

**The program is accredited by the Cyprus Agency of Quality Assurance and Accreditation in Higher Education (CY.Q.A.A.) and is in line with the Bologna Process Second Cycle degree guidelines*
