SME Climate Hub

Make your
commitment today!

Taking action on climate change is quickly becoming an essential requirement for businesses to thrive in a rapidly changing world and thus, the Cyprus Chamber of Commerce and Industry in cooperation with the NC of the ICC invite its members to **join the “SME Climate Hub”**, a **global initiative of the International Chamber of Commerce**.

The SME Climate Hub project streamlines the path for businesses to become a net-zero business by providing SMEs with a one-stop-shop to make a climate commitment by giving access to tools and resources in regards to measuring their emissions, developing a climate strategy, reducing their own emissions and the emissions in their value chain.

There is no cost to make the commitment or to use the tools on the website and **the commitment is not binding**. There is no obligation for SMEs to meet the goals of the climate commitment.

SME Climate Hub it is a **project** supported by multinational companies, financial institutions and governments with the **aim to create clear incentives and opportunities** for SMEs that commit to halving their emissions before 2030 and achieving net zero before 2050.
